

MUI Robotics

AI-NOSE TECHNOLOGY

DIGITALIZATION OF SMELL

We offer cutting-edge AI-Nose Technology. Its working principle mimics the human olfaction. It offers a detection and identification of odorous substances. Whether you're in food&beverage, agriculture, or environmental, our expertise helps you achieve groundbreaking results.

**Smell Prediction with AI
For Quality Control**

**Smell Profile
Smell Difference (%)**

**Smell Identification
For Research & Development**
